What is an Embossed Seal?.....	56
What is a Wax Seal?.....	56
What is Copy Certification by Document Custodian?.....	57

# *5 Reasons Why You Might Need This Book...*

1

You enjoy privacy or anonymity when it comes to your business and assets.

Anyone can find you if you're the REGISTERED OWNER. Therefore, it is often more effective to never own the asset. Instead, CONTROL a NON-STATUTORY (UNREGISTERED) organization that will own the asset for you.

2

You want to transfer an asset easily, quickly and seamlessly without high closing costs or lots of paperwork.

Real estate deals use costly amounts of paperwork to PROVE TITLE passed. But why pass title? It is often more effective to sell your position instead of the asset. Nobody has to know because no property changed hands.

3

You want to protect assets against court judgments.

Just because an entity owns your asset doesn't mean it can't still be taken from the entity. Trustees protect the asset with their PRIORITY LIEN on all Trust Property for TRUSTEE COMPENSATION. The asset becomes IMMUNE to court judgments, orders, divorce decrees, probate, inheritance disputes, liens, levies, garnishments, and charging orders from debt collectors until or unless the Trustee is properly compensated.

4

You don't want to create a taxable event.

No property ever changed hands, no taxable event was ever created.

5

You want to keep an asset away from thieves.

Assets may be stolen legally (taxes) and illegally (larceny). The life of the Trust is 20 years. So, for 20 years you can legally avoid all inheritance taxes, capital gains taxes, gift taxes, and property transfer taxes just by using the Trust the way it is written.

# 1 - ABOUT THE BOOK

Everything in life can be looked at as a situation. Each situation is an opportunity to move forward in the maturation of our souls. We learn something each time we're in a situation, even if we must look deeper to discover the lessons. The situations that test us the best are unique to the individual, but one type of situation seems a common test to all. The Self-Worth Test. The entire test consists of one question: When your labors finally bear fruit, who do you believe deserves the first bite?

There is no right answer because everybody fills a different role in their respective society, community, family. Some or even most roles are less than glamorous. But, if you're reading this book, how you answer the question will depend on whether you have reached a high enough point on the mountain to see your options with a bird's eye. The background to your situation is probably something like this: You are a critical thinker. You used your brains and talents to create some useful concept and now what was once a seed is bearing much fruit. It turns out that your surplus assets have made you aware that you are vulnerable. The usual suspects could take notice at any moment and demand a piece.

LOYALTY | PRUDENCE

What you are about to read is the long story of how perfectly conceivable it is that a human being like yourself can keep as much fruit of what you harvest as you please, to give first bites to whomever you wish, without having to give it to an institution out of fear. It is not only possible but quite easy and legal. It is supported by primary legal authorities, but more still it is your substantive right to do it. So, rather than winding up in a tax bracket that eats away one-third of a harvest, anyone with the right guidance can use existing laws to reduce their asset vulnerability down to none. With the right guidance, anyone can protect their estate or personal wealth, be judgment proof, and live a free, creative life. As you read this book, you will agree that we inherited an American Republic whose legal system is unique in the world in its friendliness toward prosperity for smart people.

By the end of the book we will come to the conclusion that you can do pretty much anything you want as long as it is not illegal. You can protect everything you create and everything you acquire. You won't owe taxes because you won't create taxable events. With the right guidance, you can free yourself from legal handicaps that most U.S. citizens have accepted as just a part of life. You will eventually find it fascinating to discover the law your forefathers wrote for smart people to prosper.

What the book will not do is produce the work products discussed in the book. You have to use your contacts and connections to get the right thinkers around you who can guide you and produce the work products properly the way they need to be written to be effective. The book will teach you how to read law maps, to see the correct route a transaction has to travel using the work product. All the usual suspects will want a piece of the action along the way. We'll discuss numerous things that must be in play, in the work product, working off one another to neutralize these suspects.

Before you get started, be forewarned. Above all, you need to do your due diligence. Do not have someone else do your homework. That is your first test. Your second test is designed to evaluate intent. Do not intend to evade laws or taxes of any kind using this book. The homework for the second test is learning the difference between evasion and avoidance. If need be, consult a professional to make sure your actions are legal. Your third test is a maturity test. Can you carefully read our legal disclaimer and accept full responsibility for whatever you choose to do with this information? Because of the nature of this information, we make no guarantees or warranties and we take zero responsibility for your success or failure. Measure twice and cut once.

O MUNDO É  
DOS VIVOS.
